Lecture => 7

let arr = [100, 10, 'Rick', 30, 2];
↳ mutable

arr.push(6);
arr.pop();
arr.unshift(value); → value added in the front

10	20	30	50	60

unshift → increase the computations
shift →
add 70 in front

70	10	20	10	50	60

let arr = [10, 20, 30, 40, 50];
let arr2 = arr;
arr2.push(30);
console.log(arr);

arr → | 10 | 20 | 10 | 40 | 50 |
arr2 ↑

arr → | 10 | 20 | 10 | 40 | 50 | 30 |
arr2 ↑
