Lecture =16

String

```
const str1 = "Rohit";
const str2 = 'Rohit';
const str3 = `Strike is coming soon`;
```
→ it is modern technique

length of string including spaces

```
console.log(str3.length);
```

```
console.log(str3.toUpperCase());
```

↳ is it change in original string or return the new string ?

A string is immutable so original string remain same & a new string is returned having all uppercase elements

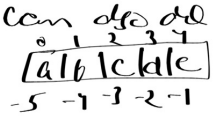

Functions of String

1. toUpperCase()
2. toLowerCase()
3. indexOf()
4. lastIndexOf()
5. charAt(0)

⑥ str[0]

⑦ substring(0,6) → -ve index is not there, rest all is same as slice

⑧ slice(0,6) → [0,6) → can also add -ve

(-5,-2) → [-5,-2)

⑨ substr(0,6)

⑩ replace(`str1nk`, `string`);

⑪ startsWith('strink');

⑫ endsWith(`day`);

⑬ includes(`one`);

⑭ trim(); → remove spaces from front and back

⑮ split(' ');

⑯ charCodeAt[0];

⑰ fromCharCode(95, 107, 107);
